H. H. S. NOTES,

There is no doubt that the success of the Hillhouse high school students in the future will be due to the selfsacrificing disposition of the principal and teachers.

Especially is this true of the teachers in literature. Mr. Thomas' valuaed coal and box cars were detailed and ble course on Tennyson and Milton, which will be continued this year, commencing Thursday, October 3, at 4:30 p. m., was a rare literary treat and much appreciated by all who heard it. It will be finished about the middle of

January, when probably "Chaucer's Canterbury Tales" will be presented. Miss S. S. Sheridan, who last year rave lectures on English literature, will ontinue with one of the most finshed courses on "Nineteenth Century Essayists," commencing October 1. It will be ten lessons, one every three weeks. Following the subjects Lesson 1, October-Development of

Miss A. McAlister's lectures last year on her trip abroad were practical and valuable from a literary point of view. Her course for this year has not as

et been announced. There seems to be trouble brewing in the Connecticut Interesholastic Football essociation because Bridgeport high school sent Instructor H. H. Todd as its delegate to Hartford last Saturday. Not only is there objection to an in structor, but also to Bridgeport, as she wants the first championship game played in Bridgeport guaranteed a financial success. President A. Merwin Gray of Hillhouse is working to have the first game played in New Haven and it remains to be seen which will pull the most wires, Gray for New Haven or Todd for Bridgeport.

A change has been made in the football schedule, Waterbury Y. M. C. A. taking the place of Meriden high school

Cure Speedy and Complete.

My little boy was afflicted with Eczema in acute form for nearly a year, during which time we tried without success, if not every known remedy, at least a sufficient number to become thoroughly alarmed. Remedies that proved efficacious for others had no apparent effect upon the child. The disorder appeared on the right check and was of a blistery and bloody form. His pillow, mornings, would bear the bloody imprint of the side of his face, while it was impossible to prevent the little fellow from scratching his face, owing to the intensity of the itching. Being advised to try Curicusa, I purchased a box. The first application was made before putting the child to bed at night, and the statement may be doubted, but it is nevertheless a fact, that the appearance of the affected parts showed a noticeable improvement the next morning. Continued use of Curicusa fully demonstrated its success, and as a result my child has as fair and smooth skin as can be found any where. We used every local application, bottle after bottle of blood medicines, all to no purpose. It was only when Curicusa was used did be find relief.
